ONLINE EXAM PREPARATION LEED AP+ BD&C

For Green Associates & LEED AP's

Four individual sessions will be held on **August 5, 12, 19, & 26, 2010**. Each session is 2 hours in length and meets from **8-10 pm EST each Thursday night**.

August 5: Review of the LEED BD&C Rating System; Sustainable Sites

August 12: Water Efficiency; Energy & Atmosphere

August 19: Materials & Resources; Indoor Environmental Quality

August 26: Innovation & Design / Regional Priority; LEED AP Exam Tips

This course will be delivered via Virtual Classroom e-Learning. You will receive the same content as you would in the classroom, with a live instructor, in real time, via the internet. A high speed internet connection and speakers or a headset are required.

Cost of the course is \$250

The fee also includes the following:

- Access to four online practice exams (unlimited use for 60 days)
- Access to LEED experts for follow up
- questions via online Forum
- Recorded class sessions for 30 days
- after final course
- Live LEED Expert Instructors

TO REGISTER FOR THE COURSE GO TO AGC-GREEN.WEBEX.COM (WWW. IS NOT REQUIRED) CLICK ON THE AUGUST CLASS FOR MORE INFORMATION, AND TO REGISTER.

WHAT IS THE LEED AP+ BD&C?

The LEED AP+ Building Design & Construction (BD&C) replaces the LEED AP for New Construction exam track. This BD & C specialty provides a standard for professionals participating in the design and construction phases of high-performance, healthful, durable, affordable, and environmentally sound commercial, institutional, and high-rise residential buildings. The AP+ BD&C is now designated a Tier 2 Accreditation.

ABOUT THIS ONLINE COURSE

Our Virtual Classroom e-Learning delivers the same content as the classroom, with a live instructor, in real time, via the Internet. It's completely interactive - ask questions and get answers from the instructor. This 4-session class series provides an in-depth approach to the LEED Version 3 Rating System specific to Green Building Design and Construction and is designed to assist individuals in their preparation for GBCI's LEED AP credentialing exam. The program focuses on the essential concepts, technical requirements, design standards, case studies/lessons learned and the tools necessary for sustainable construction to comply with the LEED Green Building Rating System and to pass the LEED AP+ BD&C Exam that is administered by GBCI.

WHO SHOULD ATTEND AND WHY?

The LEED AP+ BD&C Specialty Exam is for those professionals that implement on LEED projects. You have to pass the LEED Green Associate exam first (or in conjunction with). Additionally, in order to take this LEED specialty exam, you need to have worked on a LEED registered or certified project*. If you have access to the LEED v3 BD&C Reference Guide, that will help while following along with this course.

ABOUT THE INSTRUCTORS

The mission at Sustainable Investment Group is to assist both individuals and organizations in their career/project goals related to the green building industry. All of SIG's instructors are LEED AP's and have worked on LEED projects from inception to completion. They understand what it takes to prepare for the LEED exams and know effective ways to pass. SIG also provides expertise and environmentally focused solutions to design, construction, real estate, and building operations professionals that are seeking eco-responsible approaches to building and development through consulting, education, and training.

James R. Brown, AIA, LEED AP+, Director of Design & Construction: Brown is a 25+ year, seasoned Architect and Construction professional. He is known for delivering high-quality, high-functionality buildings within strict time and budget constraints. He is a registered Architect and teaches LEED courses throughout the country.

Charlie Cichetti, LEED AP+, Project Consultant: Cichetti oversees the sustainable consulting, construction management, facilities extension, and LEED certification services for multiple projects. He also has experience working with multiple rating systems. Cichetti has more than 9 years experience in commercial construction, real estate development and project management. Charlie has passed all of the new LEED professional exams.
