

## Regional Public Forums for New MIOSHA Standards

This outreach service will include regional public forums to inform the construction industry of any new changes in MIOSHA's safety & health regulation and educate them on how to comply.

## Outreach Forum for New Personnel

This special outreach forum for new construction managers and apprentice workers will focus on the value and importance of safety in the construction industry.

**ALL training is provided at  
NO CHARGE**

## Advanced Safety Classes

The Advanced Safety classes are typically a day long and provides in depth information on the subject matter. Special consultants, who are experts in the specific topic, are brought to help with the training. Class topics include but are not limited to fall protection, scaffold safety, rigging safety and confined space entry.

Go to [www.agcmichigan.org](http://www.agcmichigan.org) for schedules and details.

## Advanced Health Classes

The Advanced Health Classes are typically a day long and provides in depth information on the subject matter. Special consultants, who are experts in the specific topic, are brought to help with the training. Class topics include but are not limited to respiratory protection, hearing protection, air monitoring and hazard communication.

Topic(s) offered are determined by the contractor's request and/or current safety issues where training is required. Classes require a minimum of 10 attendees. Send your training request to safety director Paul Wrzesinski at [pwrzesinski@agcmichigan.org](mailto:pwrzesinski@agcmichigan.org).
